Changes have been made to club rules for all fish other than sharks and billfish effective 1st October 2014

Important details are:

- A standard form of measure will be used e.g. Shimano Bragmat or IGFA measuring device.
- All fish will be required to be measured not estimated.
- Only fork length will be accepted.
- Lengths will be rounded down to the nearest full cm.
- Fish under 60cm will not be tagged.
- For fish under 60cm a Measure and Release card will be used.
- For fish 60cm and over (70cm for yellowtail kingfish) standard GFAA tagging practices will be maintained.
- To calculate points for competitions all released fish will be treated as captures.
- Weights will be allocated from data collected on a club provided length vs weight table, variations in weight due to the condition of fish will not be considered for released fish.
- Photos to be taken of the fish on the Bragmat for checking purposes if requested by the weigh-master (This will only apply to major tournaments in the first year)
- Fish weighed will still use actual recorded weight not the data table weight.
- Data collected from weighed fish will be compared annually against data for consistency and accuracy, with any changes needed to be made before the start of the new fishing year.
- All members will be provided with data table estimate weights.

Example Calculation and Measure and Release Card

Example calculation

A 74.7cm samson fish is caught on 4kg line

Weight from table is 5.55kg (rounded down to 74cm)

$$\text{Points calculation is points} = \frac{\text{weight} \times 100}{\text{line class}}$$

$$\text{or } \frac{5.55 \times 100}{4} = 138.75 \text{ points}$$

THE GAME FISHING ASSOCIATION OF AUSTRALIA INC.
